

Foundation Compass

Explore your Foundation School preferences

Explore historical demand, understand Preference Informed Allocation (PIA), and compare preference lists under different assumptions.

Free to use. No account required.

Explore historical demand

View published UKFPO first-choice data for 2024-2026, with source links and scope notes.

Understand the process

Walk through ordinary two-pass PIA with an illustrative example.

Compare assumptions

Build preference lists and explore how scenarios change when model inputs change.

Keep these limits in view

Independent and not affiliated with UKFPO, the NHS or Oriel.

Historical demand is not a prediction.

Scenarios are conditional on model assumptions, not personal probabilities.

No allocation guarantee.

Scenarios concern ordinary, unlinked school allocation. They do not predict eligibility, reserve-list outcomes or programme allocation. The tool does not submit preferences to Oriel.
